Choose ONE session from this row to attend during this time

Early Morning Session Details:

These sessions are to run similar to an EdCamp style discussion for those attending. If you are unsure, click [THIS](#) link to learn more! You will get to choose 2 of these 4 sessions to attend, but don't worry, notes will be available for any that did not get to physically participate so they can virtually "hear" what was discussed and ideas to try!

Engagement Strategies - ideas from all staff members to learn strategies of how to get students engaged in their learning. There is a document of resources to get people thinking but also share what is NOT on the sheet! Just great ideas to take and use!!

Get Googling - this session will help you gain ideas on how to use the plethora of possibilities that Google and other digital platforms have to offer to instruct in your classroom. This is also a great place to go if you are in need of DLCs and need some "time" to gather ideas to implement in your classroom to document and submit in My Learning Plan.

MYP Unit Planning PLC Session - the idea for this session is for the ENTIRE PLC to attend to have work time to brainstorm, create unit plans, work with Mr. Smith to perfect units or construct units to work towards program expectations.

Social-Emotional Strategies - this session will offer time to discuss social-emotional concerns that we are seeing in our classrooms and beyond and ways to de-escalate situations. This will be a more facilitated discussion with strategies to take and effectively implement in our classrooms when dealing with students needing emotional support.

Late Morning and Afternoon Session Plan

10:50 - 12:00 - Data-Driven PLC time will be given with a specific agenda to complete with student details tied to strategies to use to increase course achievement. This discussion may lead into next steps for unit planning.

1:00 - 4:00 Self-Driven time that will be organized by individual teachers to work on what is needed.
